Passed all tests! <

Marked out of 1.00	count of such trees in the garden.
P Flag question	<b>Note</b> : The following letters are vowels: 'A', 'E', T', 'O', 'U', 'a', 'e', 'i', 'o' and 'u'.
	Input:
	The first line consists of an integer T denoting the number of test cases.
	Each test case consists of only one string, each character of string denoting the alphabet (may be lowercase or uppercase) on a tree in the garden.
	Output:
	For each test case, print the count in a new line.
	Constraints:
	1 ≤ T ≤ 10
	1 ≤ length of string ≤ 10 <sup>5</sup>
	SAMPLE INPUT

Today, Monk went for a walk in a garden. There are many trees in the garden and each tree has an English alphabet on it. While Monk was

walking, he noticed that all trees with vowels on it are not in good state. He decided to take care of them. So, he asked you to tell him the

Question 2

Correct

```
Answer: (penalty regime: 0 %)
   1 #include<stdio.h>
   2 - int main(){
          int t;
          scanf("%d",&t);
   5 +
          while(t--){
               char str[100000];
              int count=0;
               scanf("%s",str);
              for(int i=0;str[i]!='\0';i++){
   9 .
                  char c =str[i];
  10
                  if( (c=-'a') ||(c=-'e')||(c=-'i')||(c=-'u')||(c=-'u')||(c=-'A')||(c=-'E')||(c=-'I')||(c=-'0')||(c=-'u')
  11
  12
                  count++;

Question 3 Correct	Given a sentence, <b>s</b> , print each word of the sentence in a new line.	
Marked out of 1.00  ▼ Flag question	Input Format	
	The first and only line contains a sentence, s.	
	Constraints	
	$1 \leq len(s) \leq 1000$	
	Output Format	
	Print each word of the sentence in a new line.	
	Sample Input 0	
	This is C	
	Sample Output 0
